Edmonton, Canada

Expert Vestibular Physiotherapy at Vertex Physio

At Vertex Physio, we provide specialized vestibular physiotherapy in Edmonton to help patients recover from dizziness, balance problems, and inner ear disorders.

Our goal is to reduce symptoms, restore balance, and help you return to daily activities with confidence.

Location

Edmonton, Canada

What Is Vestibular Physiotherapy?

Vestibular physiotherapy focuses on treating problems related to the inner ear and balance system. It helps retrain the brain to adapt and function normally.

- Dizziness and imbalance
- Vertigo symptoms
- Motion sensitivity
- Difficulty walking or focusing

Vertigo Physiotherapy

Vertigo physiotherapy is highly effective for conditions such as BPPV (Benign Paroxysmal Positional Vertigo). At Vertex Physio, we identify the root cause of vertigo and treat it safely and efficiently.

- Spinning sensations
- Nausea and dizziness
- Sudden balance loss
- Symptoms triggered by head movement

Why Choose Vertex Physio?

- Experienced vestibular physiotherapists
- Customized vestibular rehabilitation programs
- Proven treatment for dizziness and vertigo
- Patient-focused, supportive care
- Convenient Edmonton location
